Mbachu Emmanuel

Data Analyst

(902) 919-6106 | emmanuelebubembachu@gmail.com | Halifax, NS | linkedin.com/in/emmanuelmbachu | https://github.com/emmanuelebube13

PROFESSIONAL SUMMARY

Analytical and research-driven Data Analyst with hands-on experience in applied research, big data analytics, and data visualization, and exposure to cloud platforms like AWS, Microsoft Azure, and applied AI models. Proven ability to collect, clean, analyze, and interpret quantitative and qualitative data to support evidence-based decision-making. Strong technical foundation in Python, R, SQL, Apache Spark, Power BI, SSIS, and SSRS, with experience translating complex findings into clear insights for technical and non-technical stakeholders.

CORE SKILLS

Data & Analytics: Python (Pandas, NumPy, Matplotlib, Scikit-learn), R (tidyverse, ggplot2), SQL (SQL Server, PostgreSQL, MySQL), Excel (Power Query, PivotTables, statistical functions), Power BI (interactive dashboards, KPIs, DAX fundamentals), Tableau, Flourish, ETL & reporting workflows (SSIS, SSRS), data cleaning, transformation and validation, exploratory data analysis (EDA), ArcGIS, large-dataset handling and performance-aware analytics

Professional & Analytical: Critical thinking and analytical problem-solving, data-driven decision-making, clear technical and non-technical communication, stakeholder engagement and requirements interpretation, organization, time management, attention to detail, cross-functional collaboration, documentation and presentation of findings

WORK EXPERIENCE

Data Analyst | Together Design Lab, Toronto Metropolitan University (Remote) Dec 2025 – Present

- Led analysis for a multi-institution research study, coordinating with academic supervisors and partner institutions across four analysis rounds and translating research questions into a delivered analytical plan
- Presented findings to stakeholders in recurring review meetings, iterating deliverables based on feedback and producing outputs at two access tiers to meet differing institutional data-sharing needs
- Built an automated verification harness that independently re-derives every published figure from source data, ensuring no unverified number reached the final report
- Engineered a reproducible cleaning and analysis pipeline over a 274-column survey instrument, resolving data-quality issues into an auditable record and deriving new measures for housing cost, commute, and geography
- Developed interactive geospatial applications (Leaflet, Folium, Plotly, ArcGIS) mapping institutional and respondent geography, built to be maintained by non-technical staff without developer support

Utility Data Analyst Intern | Detect Technologies Inc., Dartmouth, NS May 2026 – Aug 2026

- Analyzed utility infrastructure and operational data to identify trends, optimize resource allocation, and support preventative maintenance initiatives
- Facilitated the development of internal AI and computer vision models by performing high-level data curation and feature identification, directly improving the accuracy of automated infrastructure analysis
- Collaborated extensively with cross-functional teams to conduct joint analyses, ensuring accurate interpretation of structural data and cohesive, data-driven decision-making

Data Analyst | NewRoots, Halifax, NS Sep 2025 – May 2026

- Conducted data collection, analysis, and visualization to support housing and property management research initiatives
- Analyzed qualitative data from research interviews and field observations, integrating insights with quantitative analysis to support evidence-based planning and decision-making
- Developed clear visual outputs and summaries to communicate findings to research and non-technical stakeholders

Makerspace Assistant | Nova Scotia Community College, Halifax, NS May 2025 – Feb 2026

- Supported daily operations in a multidisciplinary makerspace focused on innovation, prototyping, and applied technical learning

- Operated and supported laser cutting and engraving workflows using the xTool P2, including material preparation, safety procedures, and production guidance
- Facilitated and supported a micro: bit workshop, introducing students to embedded systems, sensors, and basic programming concepts
- Gained hands-on experience in 3D modeling and additive manufacturing using Fusion 360 and Blender

Product Supervisor / Retail Specialist | The Northwest Company, Halifax, NS Summer 2023 – 2024

- Supervised inventory operations and ensured accuracy in a fast-paced retail environment
- Used Excel and internal reporting tools to track product movement and support inventory optimization
- Developed leadership, operational analytics, and data-handling skills applicable to business analytics roles
- Collaborated across teams to improve process efficiency and customer experience

EDUCATION & CERTIFICATIONS

Nova Scotia Community College (NSCC) — Halifax, NS May 2026

Diploma, IT Data Analytics

University of Nigeria (UNN) – Nigeria September 2020 - August 2023

Bachelor of Electrical Engineering

Google Data Analytics Certificate & Advanced Data Analytics Certificate

Google (Coursera)

IBM Data Science Certificate

IBM (Coursera)

AWARDS & INNOVATION

Profine | Arthur L. Irving Entrepreneurship Centre 2026

- Awarded for innovation in building a user-focused tool for navigating and personalizing application submissions

EYED – Accessibility Innovation Project | NSCC-Funded 2025

- Awarded funding to design the initial system architecture for EYED, an assistive technology concept providing suggestive feedback for visually impaired individuals
- Focused on accessibility-driven design, early system modeling, and applied technology concepts, with an emphasis on human-centered design, innovation, and social impact

PROJECTS

Project Lead & Data Analyst | Grid Power Energy 2026 – Present

- Leading a techno-economic and policy analysis of distributed vs. centralized electricity models in Nova Scotia, comparing grid-tied, storage, and off-grid configurations across residential and commercial segments
- Designing a relational database integrating utility tariff schedules, regulatory decisions, generation-mix, and reliability data from public regulatory sources
- Structuring regulatory data from Nova Scotia Energy Board filings and utility performance reports into an analysis-ready dataset
- Conducting stakeholder interviews across regulator, municipal utility, installer, and lender segments

LEADERSHIP & VOLUNTEER EXPERIENCE

Wellness Strategy Committee Member | NSCC 2025 – May 2026

- Contributed to student wellness initiatives through planning, feedback collection, and accessibility-focused discussions

Volunteer | Mission Mart 2025 – Present

- Supported daily operations and community outreach initiatives in an inclusive environment
